

Bevel cutting trolley model Cut Easy Bevel-K

This machine is used for both straight and circular cutting using three torches to achieve K bevel. Depending on the requirement one can use two or three torches to achieve V / Y or K Bevel

Features

- ✓ Aluminum die cast body for light weight
- ✓ Nozzle Mix Type of flame torch
- ✓ Stepless variation of speed by electronic control board
- ✓ Wider wheel base makes it more stable
- ✓ Pipe header is provided so that only two pipes needed to connect
- ✓ Single operating liver provided to operate three torches
- ✓ The distance between the torches can be adjusted with knob and no special tools are required to do the same
- ✓ Torch Angle can be adjusted easily with out any special tools
- ✓ Straight cut and bevel cut on both sides done on one go there by reducing the job handling time to a great extent
- ✓ Three torches operated at the same time and hence productivity increased

Technical Specifications

Machine Model	Cut Easy Bevel-K
Input Supply	230 Volts Single phase 50 Hz
Cutting Thickness (mm)	6 ~ 50
Trolley Speed (mm / Min)	50 ~ 750
Number of torches	3
Beveling Angle (Degree)	0 ~ 45
Torch Movement UP/Down (mm)	0 ~ 50
Weight (Kg)	30

Basic outfits

- 1) Cutting trolley
- 2) 1.8 Meters Rail
- 3) Circle cutting attachment
